

# Chatsworth

Designed to provide as much growing space as a small conventional greenhouse, but in a much more compact footprint, the Chatsworth is ideal if you don't want a greenhouse that dominates the garden.

The *Chatsworth* is unique – a full-sized greenhouse in HALF the space!

With the Chatsworth, all of the space inside the greenhouse is dedicated to growing – no wasted pathways or unnecessary height.

Access to the plants is so easy – with sliding panels on all 4 sides everything is within easy reach. Unlike a conventional greenhouse, ventilation is superb. Shelving, mist watering and automatic ventilation is also included.

## Staging

Glass centre staging allows plenty of light down to the lower levels of the greenhouse.

These toughened glass sheets can be removed for taller crops such as tomatoes.

## Safety Glass

Real glass traps the sun's warmth, boosting early crop growth.

The Chatsworth is glazed in 4mm toughened safety glass – the same glass you would find in a double glazed window.

**4mm  
Safety Glass**

## Potting Up

For potting up a convenient work station is included. This is colour coated the same colour as the greenhouse.

## Shelving

10 seed tray shelves are included for maximum storage. The height of these can be adjusted and, if not required, will drop out of the way or can be removed.

## Watering

8 mist nozzles provide gentle watering throughout the greenhouse. Valves allow the misting to be zoned.

An optional timer can be used to automate watering.

## Automatic Ventilation

Automated ventilation is provided by two louvre vents. Both have a temperature sensitive mechanism to open and close the vent as the temperature changes.

## Superb Ventilation

In addition to the two automatic vents the roof panels, side panels and end panels also slide for ventilation. As glass on every side can be opened, cooling through-drafts ensure even in hot weather the greenhouse keeps cool!

## Colour Coating

The Chatsworth can be supplied in a natural aluminium finish or for an additional cost it can be powder coated. The polyester powder coating is baked onto the aluminium to provide an extremely durable finish. Eight standard colour options are available. However, for a really unique greenhouse, for an additional cost, we can match any RAL colour.

## Installation

The Chatsworth comes with comprehensive instructions for self assembly as standard. However, we can provide an installation service for mainland destinations up to 140 miles from our base in Northamptonshire.

For locations up to 60 miles away the cost would be £229. For installations 140 miles away the cost would be £349. There is an additional charge for London postcodes.

Please call for a quote.

## Ordering

Ordering is easy – you can either order online or you can call our office. We are very happy to have a chat about the greenhouse if you have any questions.

## Framework

The framework is manufactured from architectural aluminium alloy and comes with a 25 year guarantee.

Code	Length	Seed Tray capacity	Price	Colour Coating	
				Frame	Shelves
CY5	6' 5" (1.94m)	104	£1,549	£394	£74
Architectural aluminium framework, 4mm toughened safety glass, 10 shelves, middle staging, 2-tier mist watering, two auto louvre vents, potting tray, delivery and VAT.					
Width: 4' 11" (1.50m) Height 5' 11" (1.81m)					

## Other models in the *Classic Range*

The Chatsworth is the jewel in the crown of the Access range, but we manufacture a very wide range of lean-to and free-standing models. For our full range, visit our website [www.garden-products.co.uk](http://www.garden-products.co.uk)

The *Hampton* is ideal where space is limited, with the lean-to design minimising floor space.

The *Hampton-D* is a lean-to model, designed to fit against a wall. Sliding doors allow easy access.

## *Payment Plan*

We know that quality does not always come cheap, we give you the option of our Easy Payment Plan.

This allows you to spread the cost over 4 easy payments. There are no finance charges for this.

Written details available on request.

**1**

When your order is placed your credit card will be debited for 25% of the total.

**2**

After that, 25% of the total will be charged to your card for each of the next 3 months.

**3**

This means you can start gardening under glass NOW and pay later.

The *Exbury* is 2' 8" (0.79m) wide and is accessed using sliding door panels front and back.

# History of Access

Started in 1958 by Mr Graham Pearce who, tired of working as an industrial chemist, decided to start a market garden. To get his Strawberry crops ripened earlier he designed a Cold Frame. The excellent light transmission and easy access and ventilation meant that he was soon selling the cold frames to other market gardeners, and slowly more of the nursery was turned over to the production of the frames.

Eventually the main market became keen gardeners and the range of products expanded as customers' needs changed. Although Access still sells Cold Frames the most popular models today are Mini greenhouses and Growhouses.

The business is still family owned and is still based on the original nursery site.

# Testimonials

Please pass on to your people that I am very impressed with your assembly instructions and to the quality of the alignment of the drilled holes in the aluminium frames for the assembly bolts. **PH**

All safely delivered and packaged beautifully. It is in the process of being erected. We have been very impressed at the service you have provided **VM**

We're absolutely delighted with the product and the service you provided. Customer services are so important these days. **PG**

I would like you to know that I am extremely pleased with the finished Growhouse. The instruction manual supplied was very detailed yet simplistic in layout and a real bonus.....no component parts were missing! One very satisfied customer! Thank you very much. **TG**

I have just had the mini greenhouse for a month and writing to say am thrilled with it. Hubby said the instructions were clear and the secret was in taking time to assemble correctly (mostly on my kitchen table). It looks absolutely great in our small garden and already stuff is growing well. So pleased with this quality item and what a kick seeing the louvre window do its opening and shutting on its own. **MT**
